

Sales & Revenue Analysis Dashboard Project Report

1. Project Title

Sales & Revenue Analysis Dashboard

Tools Used: Microsoft Power BI, Microsoft Excel, GitHub.

Project Type: Business Intelligence and Data Visualization Project.

2. Project Objective

Design an interactive dashboard to monitor sales performance, analyze revenue trends, track KPIs, and generate business insights for data-driven decision-making.

Objectives: Analyze overall sales and revenue. Track business KPIs. Identify top-performing products. Compare regions and categories. Understand revenue trends. Analyze profitability.

Dataset Description

Fields: Order ID, Order Date, Customer Name, Product, Category, Region, Quantity, Unit Price, Sales, Profit. Dataset format: Excel/CSV.

4. Data Preparation

Removed duplicates, handled missing values, corrected data types, formatted dates, created DAX measures, and added month/year fields.

DAX Measures

Total Revenue = SUM(Sales)

Total Profit = SUM(Profit)

Total Orders = DISTINCTCOUNT(Order ID)

Average Order Value = Total Revenue / Total Orders

Profit Margin % = (Total Profit / Total Revenue) × 100

5. KPIs

Total Revenue, Total Profit, Total Orders, Average Order Value, Profit Margin %.

6. Visualizations

Revenue Trend (Line), Sales by Category (Bar), Top 10 Products (Bar), Sales by Region (Column/Map), Profit by Category (Column), Revenue Share (Pie/Donut).

7. Interactive Features

Slicers: Year, Month, Region, Category, Product.

8. Business Insights

Highest Revenue Product, Best Region, Highest Revenue Month, Most Profitable Category, Overall Profitability.

9. Recommendations

Increase inventory for top products, promote high-profit categories, improve weak regions, leverage seasonal trends, encourage bundles, monitor KPIs.

10. Conclusion

The dashboard transforms raw sales data into actionable insights using Power BI, demonstrating BI, DAX, visualization, Excel, and GitHub skills.

Deliverables

Dataset, PBIX file, screenshots, documentation, GitHub repository.

Skills

Data Analysis, Visualization, Power BI, Excel, DAX, KPI Development, Business Intelligence, GitHub.
